ROMAIN GOLDENCHTEIN

6-Month Master's Internship in Reinforcement Learning / Machine Learning

OBJECTIVE

Final-year computer science engineering student at UTT, currently on exchange at the University of Tokyo. Looking for a **6-month Master's internship** starting **March 2027** in **Reinforcement Learning** or **applied Machine Learning**, to learn and actively contribute to innovative projects that build on my experience in artificial intelligence.

EXPERIENCE

R&D Intern - Deep Reinforcement Learning (NVIDIA Omniverse)

DELMIA (Dassault Systèmes) — 02/2026 - 07/2026 | Vélizy, France

- RL-based scheduling of an AGV fleet supplying an assembly line.
- Factory simulation in NVIDIA Isaac Sim/Isaac Lab: kanban flows, batteries, dynamic obstacles, vectorized across 16,384 environments.
- Architecture combining PPO, a Transformer and DeepSets, with domain randomization and curriculum learning for generalization.
- The agent outperforms kanban heuristic baselines on several fixed scenarios.
- Research on GNNs and evolutionary algorithms (CMA-ES).

Machine Learning Engineer (Freelance)

Labelbox (Alignerr) — 11/2025 - Present | Remote

- Design expert problems and solutions in machine learning, deep learning and reinforcement learning for the largest AI labs, to evaluate, train and push the limits of top LLMs.
- Supervise a team of 75+ contributors: progress tracking, writing guidelines, answering questions.
- Produce and validate training data; stress-test models to uncover biases and reasoning failures.

LLM Response Alignment (Freelance)

Outlier.ai — 01/2025 - 12/2025 | Remote

- Analyzed GPT-style LLM outputs for consistency and hallucination reduction; wrote detailed reports.

Project Manager

Junior Conseil UTT (Junior Enterprise) — 09/2024 - 02/2026 | Troyes, France

- Managed client projects (scoping, planning, deliverables), coordinated students and clients, ensured quality and deadlines.

EDUCATION

Special Auditor Student

The University of Tokyo (Todai) — 10/2026 - 02/2027 | Tokyo, Japan

- Research project in Prof. Shinsuke Murakami's laboratory: Multi-Agent RL (MARL) to simulate the decisions of economic and social agents in agent-based models (ABM) of resource management and circular economy.

Engineering Degree (Master's level), Computer Science and Information Systems

UTT (University of Technology of Troyes) — 09/2022 - 2027 | Troyes, France

- Specialization in Artificial Intelligence and Data Science (machine learning, deep learning, intelligent systems).

ACADEMIC PROJECTS

Solving the Rubik's Cube with Reinforcement Learning — Technical report (HAL) — 02/2025 - 07/2025

- Deep RL agent inspired by DeepCube (McAleer et al., 2018) combining Autodidactic Iteration and Monte Carlo Tree Search (MCTS), trained with TensorFlow.
- Self-supervised pre-training to estimate the distance to the solved state.
- Built a physical robot that executes the algorithm's solutions.

Fall Detection — **Deep learning** — 05/2025 - 06/2025

- EDA, data preparation and augmentation; comparison of CNN/LSTM architectures and a hybrid CNN.

Credit Default Prediction — **Machine learning** — 11/2024 - 01/2025

- Supervised models (logistic regression, trees, kNN, neural networks) with cross-validation; precision, AUC, recall.

SKILLS

AI & Simulation: Python, PyTorch, TensorFlow, Scikit-learn, Pandas, Isaac Sim/Lab
Development & Data: C, Java, R, Git, Docker, MySQL, MongoDB, ReactJS, Node.js, HTML/CSS
Languages: French (native), English C1+ (Linguaskill), Spanish B2 (SIELE), Russian (intermediate), Japanese (beginner)
Interests: Hip-hop dance (12 years, about twenty performances); Chess (self-taught, competitions, 1600 Elo on *chess.com*)
